

Rahim Rashid BSc (Hons) FIA

Senior Report Writer

I started out in the pensions industry in 2005 and qualified as a Fellow of the Institute & Faculty of Actuaries in 2009. I joined Mathieson Consulting in 2020, and I prepare and advise on Expert Witness reports in the area of pensions and divorce.

Prior to joining Mathieson Consulting, I worked as a consulting actuary at Hughes Price Walker and as an appointed Scheme Actuary provided advice to the trustees of defined benefit pension schemes. The sponsors of these schemes included charities and companies in the agriculture, insurance, and manufacturing industries. I have experience of advising on scheme funding, early/late retirement factors and the assumptions used to determine transfer values, with formal advice on such matters provided in written reports as well as at trustee meetings. As a Scheme Actuary, I provided advice alongside other appointed professionals and hence I have worked with professional trustees, corporate advisers and lawyers.

Despite holding a Scheme Actuary certificate, I have remained hands-on and therefore have experience in also utilising the actuarial factors used to determine pension benefits for individual scheme members and the transfer value of an individual's benefits.

As well as what may be considered traditional actuarial work, I have provided training sessions to trustees to facilitate them meeting the requirements of the Pension Regulator's trustee knowledge and understanding regime.

My experience as an actuary also includes advising companies and higher education institutions on disclosures for company accounts, liability management exercises and due diligence with regards to proposed mergers.
